Continuation of 3. NOTE: The proposed limitations have never in claims; thus, they raise new issues.

Continuation of 11, does NOT place the application in condition for allowance because: of reasons set forth in prior office action. Applicants argue melt-spun ribbons would have an average particle diameter of "less than 2 µm". But, instant casting product would have an average particle diameter of "2 µm or more". "Less than 2 µm" is not considered patentable distinct from "2 µm or more" because "2 µm" is considered overlapped .
